

A heatmap visualization showing the Spearman correlation coefficients between 16 variables. The variables are labeled on the x-axis and y-axis as NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA, NA. The color scale ranges from -0.5 (blue) to 1 (red), with 0 being white. The diagonal elements are all 1 (red). The heatmap is symmetric, and the dendrograms on the top and left indicate the hierarchical clustering of the variables based on their correlation. The variables are clustered into several groups, with the most highly correlated variables (red) forming a large block in the center-right of the heatmap.
